

**DAF XF, CF AND LF**  
PURE EXCELLENCE

The benchmark for  
transport efficiency

## DAF XF, CF AND LF PURE EXCELLENCE

Inspired by our DAF Transport Efficiency philosophy, our industry-leading range of trucks is better than ever. Numerous innovations deliver increased driving power, incredible fuel savings, superb manoeuvrability and higher payloads. What's more, a whole host of features improve driver comfort and efficiency. So whether your needs are long-distance haulage, city distribution, construction transportation, bulk or tank transport, DAF trucks set new standards to deliver **Pure Excellence**.

The leading truck for  
long-distance transport

The XF is the benchmark truck for long-distance transport. Multi-torque PACCAR MX-11 and MX-13 engines with new power ratings deliver higher torque at lower rpm. Combined with high-performance gearboxes, optimised drivelines, high-efficiency rear axles and aerodynamic improvements, this gives you **increased fuel efficiency of up to 7%** for long-haul journeys.

**Higher productivity**

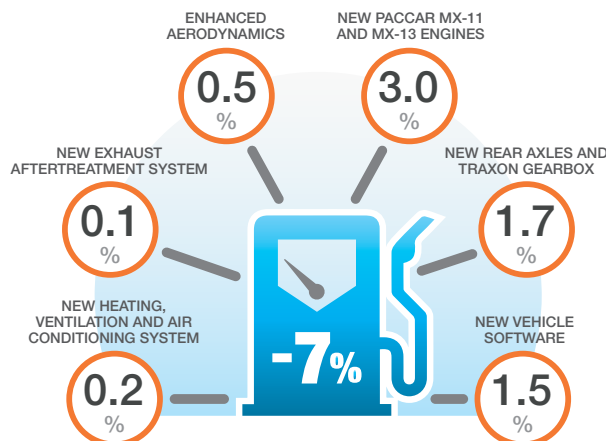

The XF is lighter and more reliable than ever. An ultra-compact Emission Aftertreatment System (EAS), redesigned engines and chassis optimisations deliver up to 100 kg in weight savings depending on axle configuration. This allows higher payloads, which are especially important in applications where every kilogramme counts. In addition, the new electrical and electronic architecture improves the XF’s best-in-class reliability. What’s more, the DAF Connect fleet management system gives you real-time insight into the performance of your drivers and vehicles, helping you to optimise the use of your trucks. All this results in maximum vehicle availability and lowest operating cost. Service intervals even go up to 200,000 kilometres!

**Outstanding driver comfort**

The XF offers new levels of driver comfort. We have added features that make the cab an even more attractive and comfortable place to work, live and sleep. There are many new options that allow you to personalise the interior for unmatched comfort and luxury. And we have introduced numerous innovations that make driving easier, safer and more enjoyable than ever.

**Perfect match**

No matter what axle configuration you require, there’s always an XF that perfectly matches your needs. Whether your focus is on highest payload, excellent manoeuvrability and yard friendliness or all of these!

# Exterior design evolution

New design features ensure the XF is the most eye-catching truck on the road. They also contribute to excellent aerodynamics to enhance your transport efficiency.

## **NEW SUN VISOR**

The sun visor has a new design to optimise aerodynamics and includes a stylish alu element for great exterior appeal.

## **REDESIGNED DAF LOGO**

The DAF logo has been redesigned with chrome edges and an attractive aluminium-look, symbolising the truck's quality.

## **GRILLE MESH**

Grille mesh gives the XF a strong, appealing and modern look.

## **LOWER BUMPER INSERT**

For a high-end appearance, the lower bumper has an aluminium-look accent.

**PRACTICAL UPPER PANEL**

There's a large panel above the DAF logo so you can add your company name.

**GREAT WELCOME**

A stylish DAF logo in the doorstep welcomes the driver to the luxurious cab.

**AIR FLOW GUIDANCE**

New grille and cab split closures enhance aerodynamics for optimal fuel efficiency.

**WHEEL ARCH AIR FLOW GUIDES**

Wheel arch air flow guides have been introduced to optimise aerodynamics.

# The benchmark for driver comfort

The XF builds on the excellent standards of driver comfort for which DAF's top-of-the-range truck is renowned worldwide. It offers the biggest interior space available on the market, the best and largest bunks and an extremely attractive look and feel.

## **Class-leading interior**

Warm and tasteful sand colours for dashboard, seats, curtains, mattresses and walls give the interior a great appearance in which every driver feels comfortable and at home. A 6-star working and living environment!

### ▲ Driver configurable switches

Thanks to smart electronics, switches can be positioned according to individual applications and preferences. This adds to great driver comfort as well as maximum vehicle efficiency.

### ◀ High-end trim

The dashboard comes in Dark Sand trim with Piano Black deco panels as standard. The deco panels also come in the colours Rustica (dark wood) and Argenta (silver). It all adds up to a stylish, modern look.

### Best-in-class interior lighting

The interior lighting features ergonomic switches that are within easy reach throughout the cab. The driver can select different lighting modes for various driving and resting conditions, and there's also a dimming function.

### Better driver information

The XF's driver information systems make it easier to take effective action. The beautiful and clear instrument panel has improved fonts and styling for better readability. The Driver Information Panel provides more information to increase driver comfort and efficiency. And the Driver Performance Assistant (DPA) includes tips for economical driving.

The best all-round  
truck on the road

Sturdy, strong and efficient, the CF is a versatile all-rounder. Like the XF, it delivers **increased fuel efficiency of up to 7%** for long-haul journeys. From construction to distribution, the CF offers a tailored solution for any transport application.

### **Maximum profitability**

High payloads and maximum uptime both contribute to the CF's superb efficiency. Redesigned PACCAR MX-11 and MX-13 engines, an ultra compact Emission Aftertreatment System and optimised chassis configurations reduce weight by up to 100 kg, increasing payload capacity. Optimised wiring and connections not only deliver the highest reliability, they also offer great flexibility when it comes to adding auxiliaries. In addition, the DAF Connect fleet management system helps you manage your vehicles and drivers for optimal efficiency and availability. All this maximises your profitability per kilometre.

### **Customisable driver comfort**

Drivers will love the cab interior. Attractive colours, soft fabrics and the most comfortable seats make them feel instantly at home the moment they climb inside. User-friendly lighting and climate control ensure optimum working conditions. And there are a wealth of options that allow you to configure the interior according to individual requirements.

### **Outstanding versatility**

The CF's highly flexible chassis gives you a wealth of options when positioning components. And with the ultracompact Emission Aftertreatment System (EAS) there's more than enough space for other equipment. The CF's versatility is further enhanced by an extensive Body Attachment Module programme that enables quick and optimal mounting of auxiliaries.

# Attractive exterior design

The CF's exterior includes leading-edge design features that put it in a class of its own when it comes to visual appeal.

## **SUN VISOR**

The sun visor has a new design to optimise aerodynamics and enhance fuel efficiency. It also includes a stylish aluminium-look element for great exterior appeal.

## **LOWER BUMPER INSERT**

For a high-end appearance, the lower bumper has an aluminium-look accent.

**PRACTICAL UPPER PANEL**

There is a large panel above the DAF logo so you can add your company name.

**REDESIGNED DAF LOGO**

The DAF logo has been redesigned with chrome edges and an attractive aluminium look, symbolising the truck's quality.

**SILVER GRILLE STRIPS**

Silver grille strips give the CF a strong, appealing and modern look.

# Extremely comfortable interior

The CF interior has a high-end look and feel that leads the industry. The seats have new trim while warm colours create an appealing, welcoming environment. The user-friendly interior lighting allows the driver to adjust lighting to driving and resting conditions. And because the CF is the most versatile truck on the market, there are many options to customise the cab.

## **Driver configurable switches**

Thanks to smart vehicle electronics, individual switches can be positioned according to your requirements. These driver configurable switches also make it easy for dealers and bodybuilders to add new functions without the need to install extra control panels. The perfect combination of great driver comfort and maximum vehicle efficiency.

## **High-comfort climate control**

The completely new climate control unit stands out when it comes to comfort and user-friendliness. It features one-touch defrosting, park ventilation, park heating with timer, optional rest heat utilization and automatic air recirculation.

## **Improved driver performance**

The Driver Information Panel provides comprehensive information to increase driver efficiency. The instrument panel fonts are extremely clear so the driver can register information at a glance.

# Perfect match

## Always the optimal truck for your job

Whether you need a 2-, 3- or 4-axle truck, single or double driven, there is always a CF that perfectly matches your needs!

### Improved Silent version

The CF with PACCAR MX-11 engine is now available in an improved Silent version that reduces noise levels to 71 dB(A). The XF and LF are also available in Silent version.

### New double mounted trailing axle

A new double mounted trailing axle increases fuel efficiency and reduces vehicle weight by 25 kg. It also increases static carrying capacity from 29 tonnes to 34 tonnes.

### New electro-hydraulic-steered trailing axle

The new trailing axle for both tractors and rigids incorporates a highly precise Electric Hydraulic Steering system that continuously calculates the optimal steering angle for the rear axle wheels.

### Lightweight FAD mixer chassis

The lightweight, high-performance CF FAD 8x4 mixer chassis with a 19-tonne single reduction (SR1132T) tandem and two 7.1-tonne front axles is available throughout Europe. It comes with the new PACCAR MX-11 engine, with power ratings from 270 to 330 kW (370 to 450 hp).

The distribution  
champion

The LF offers industry-leading payload and unmatched manoeuvrability along with superb durability, comfort and driver friendliness. As DAF's successful distribution truck, it's built to improve your profitability.

#### **Designed for city distribution**

With a large range of wheel bases, designed PACCAR PX engines and high-efficiency gearboxes, the LF is available in more variants than ever before. In particular, the new LF150 and LF170, with a PACCAR PX-4 engine and a five-speed manual gearbox, are designed for city distribution.

#### **Maximum vehicle availability**

The robust engine block and cylinder head are built with a long service life, ultimate reliability and low weight in mind. PACCAR PX engines are also designed to simplify maintenance and optimise performance. In addition, the DAF Connect fleet management system helps you maximise vehicle availability.

#### **Excellent driver comfort**

The splendid new interior design makes the LF the most attractive and comfortable in this segment. We have introduced innovations that make driving easier, safer and more enjoyable than ever. New interior fabrics and new seat functionality offer the highest level of driver comfort.

# High-end exterior design

The LF's superb exterior design gives it a strong and friendly look, making the truck a great advertisement for your business.

## **ROOF AIR DEFLECTOR AND COLLARS**

The roof air deflector and collars improve aerodynamics and reduce fuel consumption by up to 4%.

## **VISION DOOR**

The vision door is an important new feature of the LF, especially in city distribution transport. It improves safety by giving drivers a better view of pedestrians and cyclists on the near side next to the cabin. The co-driver side window is controlled electronically from the drivers side and slides to open.

**PRACTICAL UPPER PANEL**

There is a large panel above the DAF logo so you have plenty of room to add your company name.

**REDESIGNED DAF LOGO**

The DAF logo has been redesigned with chrome edges and an attractive aluminium look, symbolising the truck's quality.

**SILVER GRILLE STRIPS**

Silver grille strips give the LF a strong, appealing and modern look.

# The highest standard of driver comfort

A comfortable driver is a better driver. That's why the interior is such an important part of the LF. The moment the driver steps into the cab, he or she enjoys the highest standard of comfort, user-friendliness and safety.

## **The perfect working environment**

The dashboard is both attractive and comprehensively equipped, offering maximum ease of use. All controls are within easy reach. And the extra-large capacity of the heating and ventilation system means the interior can quickly be brought to the ideal temperature.

## **Increased driving efficiency**

The Driver Information Panel is designed for clarity and high readability. It provides a wealth of information to make driving more efficient and cost-effective.

### **Ergonomic design**

The adjustable, multifunctional steering wheel contributes to an excellent driving position. There are integrated switches for operating the cruise control, engine brake, radio and hands-free TruckPhone.

### **Highly adjustable seat**

The LF has an extremely comfortable driver's seat, with a large range of adjustments; up to 180 mm longitudinal and 120 mm vertical.

### ▲ New high-end trim

The cab features a high-end trim with stylish new fabrics in warm colours for the seat, curtains and optional mattress. All this is designed to make drivers feel at home as soon as they step into the cab.

### Getting the best out of the driver

Settings are grouped on the instrument panel in a logical way and the Driver Performance Assistant helps the driver make the best use of the LF's cost-saving features.

### Great storage space

The LF offers extensive storage options: a spacious lockable compartment on the engine tunnel, side pockets in the door panels and two large compartments above the windscreen.

# High-performance engines

World-class transport efficiency starts with the engine. The XF, CF and LF are powered by the latest PACCAR engines. Each one is designed to deliver market-leading fuel efficiency, excellent performance, highest reliability, low emissions and superb driver comfort.

## Higher torque at lower rpm

The XF and CF are powered by multi-torque PACCAR MX-11 and MX-13 engines with new power ratings. Many innovations result in even more torque at lower rpm for highest fuel efficiency. Vehicles can now cruise at some 900 rpm, which also results in the kind of low noise levels found in luxury cars. Additional torque is available in top gear for great driveability and the new MX engine brake delivers world-class braking power at lower revs. The XF and CF also include an extended set of Eco Mode options and service intervals have been extended to up to 200,000 km! All this results in better fuel economy, reduced emissions and lower operating costs.

## High-efficiency gearboxes and rear axles

The latest generation of TraXon automated gearboxes (12 and 16 speed) are standard on the XF and CF. Reduced friction losses, even faster upshifts and the extended use of EcoRoll contribute to lowest fuel consumption, while driver comfort is enhanced thanks to its quiet and smooth operation and precise clutch actuation. The LF is supplied with a wide selection of manual, automated and automatic gearboxes in 5, 6, 9 and 12 speeds. The XF and CF also feature a new family of highly efficient rear axles with low-friction wheel ends. A range of faster ratios starting from 2.05:1 enable lower engine speeds for highest fuel efficiency.

**MX-13**

**MX-11**

**PX-7****PX-5**

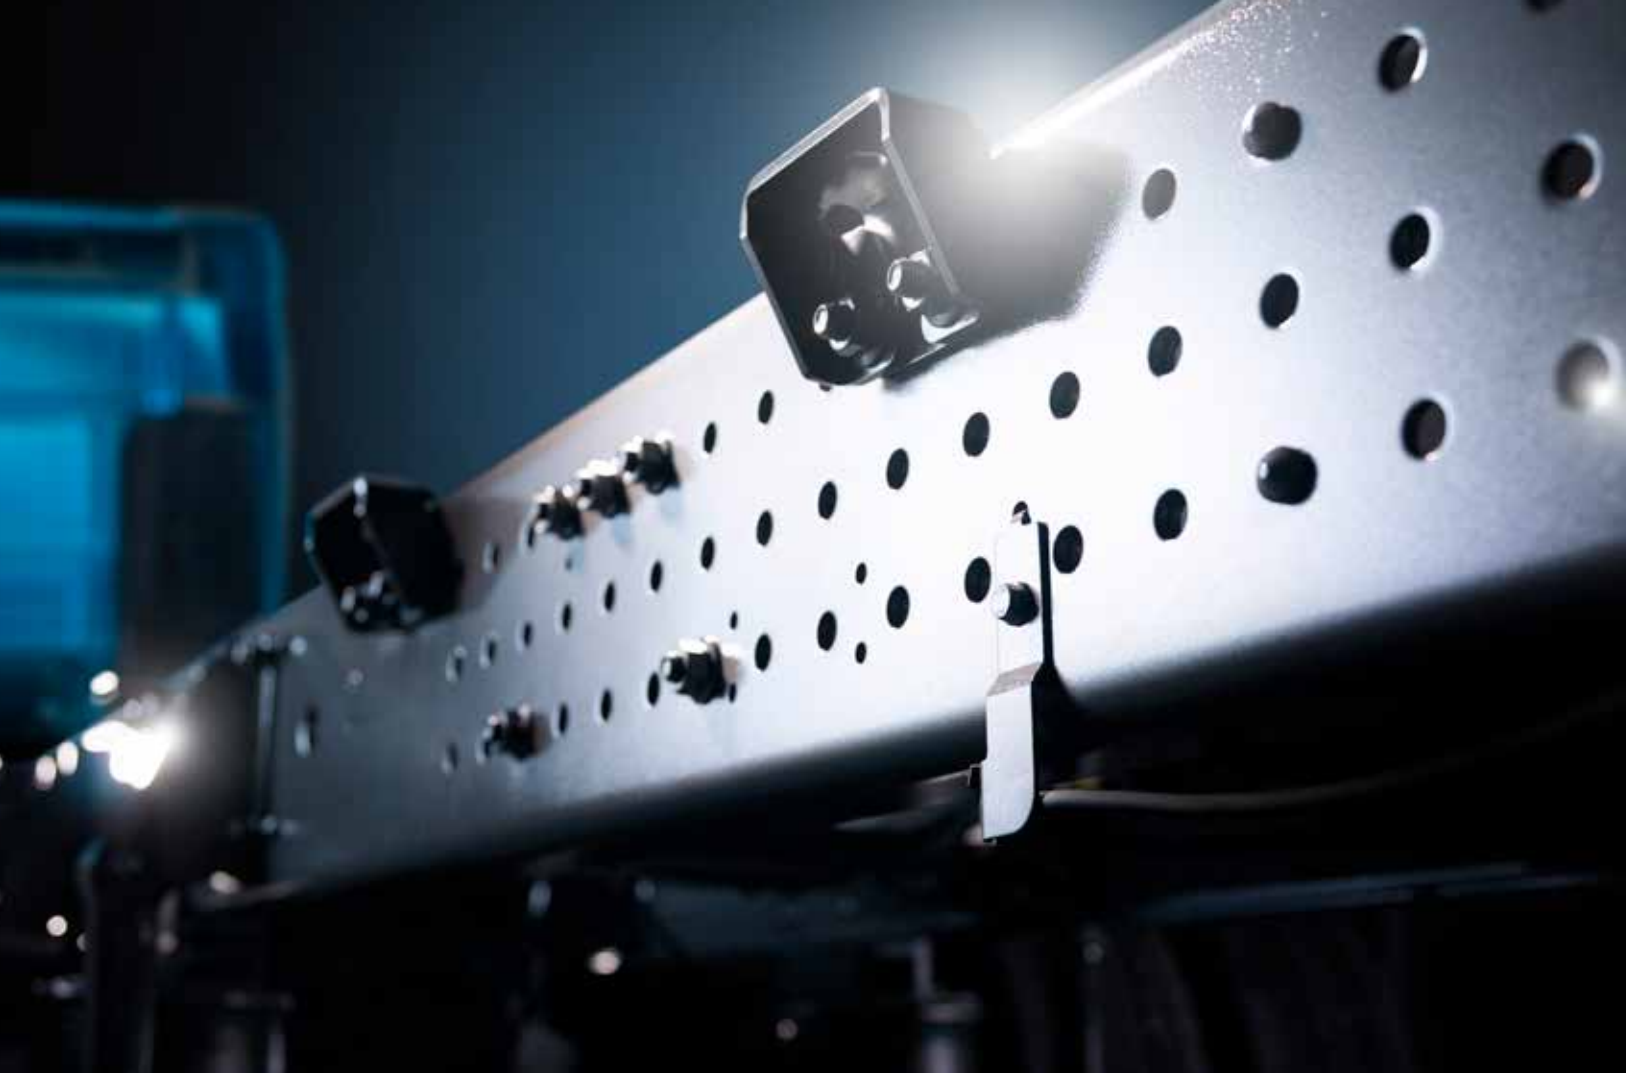

### **Powerful engines for distribution**

A wide range of engines are available for the LF. These include the powerful four-cylinder 4.5-litre PACCAR PX-5 and the six-cylinder 6.7-litre PACCAR PX-7\*. Thanks to new software and optimised heat and air management, maximum torque has been increased and kicks in at lower speed in both engines. New, faster rear axle ratios result in lower engine speeds. Together with engine innovations, this results in fuel savings of up to 6%. A compact four-cylinder 3.8-litre PACCAR PX-4 engine is also available.

### **Added driver comfort**

All PACCAR engines naturally comply with the latest emission requirements and their compact design means the engines are remarkably quiet - adding to driver comfort. The special Silent version is unique in the market, opening up further distribution options in urban environments.

\* Also available for the CF.

# The perfect base to build on

Low kerb weight and high load capacity put DAF trucks at the top of their class, meaning pure profit for your business. With their modern, strong and light chassis, DAF trucks don't compromise on robustness and flexibility.

## **Strong, light and manoeuvrable**

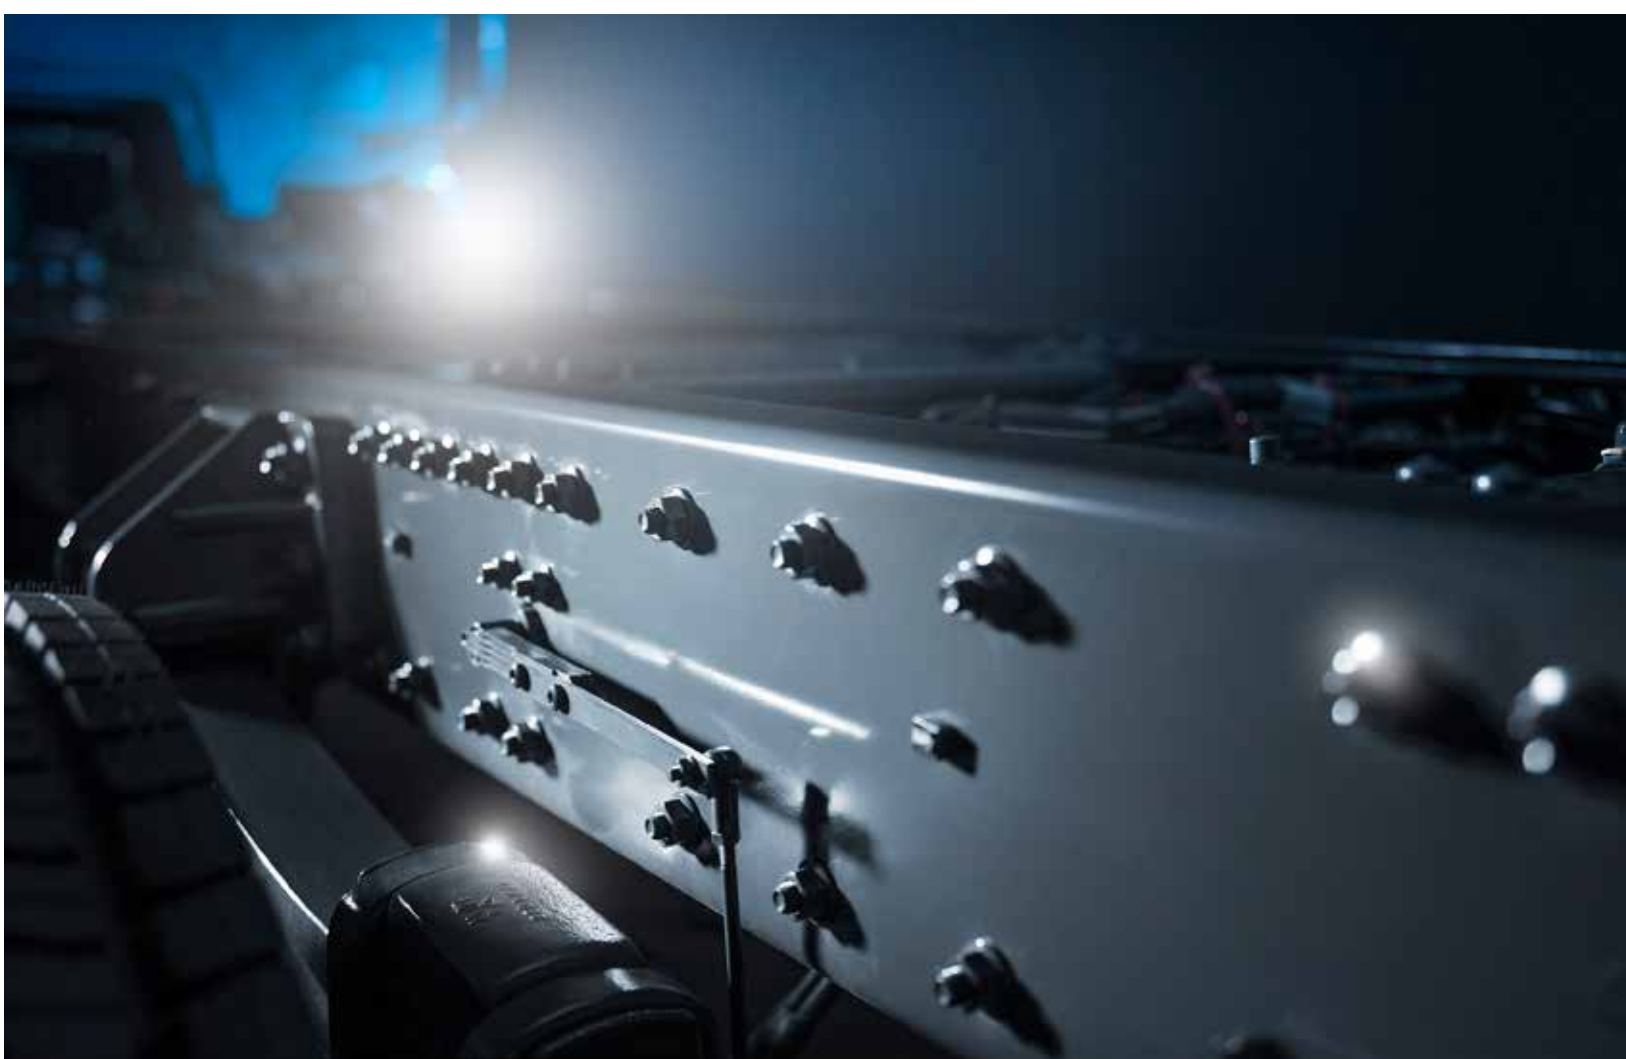

Made from high-quality steel, a DAF truck's well-thought-out chassis is both light and strong, increasing both fuel savings and payloads. The axle suspension is also fully optimised to ensure great stability and superb handling. The result is an extremely comfortable driving experience.

**Maximum flexibility**

DAF trucks offer unmatched efficiency when it comes to chassis configurations. The highly flexible chassis allows almost endless variation when positioning components and the smart chassis layout enables fuel tank volumes of up to 1,500 litres on tractors.

**Superb bodybuilder friendliness**

DAF trucks offer an extensive Body Attachment Module (BAM) programme that bodybuilders will love. This allows fast, easy positioning of tippers, cranes, tail lifts and other equipment. It also shortens throughput time and reduces build costs.

DAF Service Concept  
A total transport solution

Pure Excellence in transport efficiency goes beyond the truck itself. DAF offers a total transport solution through a range of professional services that enable you to select the right vehicle, secure the financing, and maintain your fleet at peak efficiency.

### **DAF MultiSupport**

This flexible repair and maintenance service gives you maximum assurance at a fixed price per kilometre. You determine the service level that best fits your requirements and then expand it when needed to include trailers and bodywork. Your DAF dealer takes maintenance planning and administration off your hands. As a result, you can focus on your core activities, sure in the knowledge that your fleet will always be in perfect condition.

### **PACCAR Financial**

As DAF's in-house finance provider, PACCAR Financial has over 50 years of experience offering customised financial services for the transport sector. A unique understanding of your day-to-day business makes them your ideal partner. Their tailored financial solutions not only cover fleet financing, but also complete combinations including bodywork and trailers along with repair and maintenance options.

### **PACCAR Parts**

As well as original DAF parts and PACCAR engine parts, PACCAR Parts supplies over 70,000 universal TRP Truck & Trailer parts for all makes of trucks and trailers, including workshop consumables. With distribution centres in the Netherlands, the UK, Russia, Hungary and Spain, PACCAR Parts delivers orders throughout Europe within 24 hours. What's more, delivery reliability is 99.98%, making PACCAR Parts the best in the industry. Max Card holders also benefit from special deals and discounts.

### **DAF ITS**

DAF's International Truck Service (ITS) is often copied but never equalled. No matter where you are in Europe help is just a telephone call away. Our service team assists you in 15 different languages, 24 hours a day, 365 days a year. Our local technicians will do everything possible to get your truck back on the road fast.

### **DAF Dealer Network**

With our extensive network of professional sales and service dealers, there is always a DAF representative nearby ready to give you expert service throughout the lifetime of your vehicle. Highly qualified DAF technicians have in-depth knowledge of your vehicle, ensuring fast, effective repair and maintenance, using original PACCAR, DAF and TRP parts. This guarantees maximum vehicle availability and high residual values.

### **DAF Driver Academy**

Drivers are indispensable when it comes to achieving the highest level of transport efficiency. DAF training courses help them reduce fuel consumption, anticipate better and increase road safety. In fact, drivers who complete our courses realise economy improvements of up to 10% as well as adopting a safer and more relaxed driving style.

### **DAF Connect**

In our drive for transport efficiency, the DAF Connect fleet management system gives you a real-time insight into the performance of your trucks and drivers. A customisable, user-friendly online dashboard presents clear information on vehicle location, fuel consumption, mileage, fleet utilisation and idle time. It also provides comprehensive fuel reports with current and historical data enabling you to compare vehicles and drivers. The Live Fleet View feature displays the precise truck location enabling simple fleet planning showing distances, routes and driving time. You can receive self-defined alerts when deviations occur in parameters like speed, route, location and fuel consumption so you can take immediate action. Drivers can also monitor their own driver performance score displayed on the vehicle dashboard. In addition, you can give your DAF Dealer access to your data, allowing him or her to assist you with maintenance planning and advice. By optimising vehicle availability, reducing operational cost and enhancing logistical efficiency, DAF Connect maximises your profitability per kilometre.

# Excellent safety and comfort

The DAF range includes standard and optional features that not only ensure the highest possible safety of the driver and other road users, but also contribute to vehicle versatility, fuel efficiency and comfort, no matter what business segment you are in. Please note that not all features are available for the LF.

- 1. Predictive Cruise Control** Predictive Cruise Control (PCC) uses GPS technology to determine the exact location of the truck and the expected driving conditions up to the next 2 kilometres. It uses this information to determine the ideal speed within a specified range. Together with Predictive Shifting, PCC can reduce fuel consumption and CO<sub>2</sub> emissions by 3%.
- 2. Adaptive Cruise Control** Adaptive Cruise Control (ACC) automatically adjusts the truck's speed to maintain a safe distance from the vehicle ahead.
- 3. Forward Collision Warning** Forward Collision Warning (FCW) generates a warning sound and a visual alert on the instrument panel, urging the driver to take action in order to prevent a collision.
- 4. Advanced Emergency Braking System** The Advanced Emergency Braking System (AEBS) intervenes to slow the truck down in an emergency.
- 5. Lane Departure Warning System** The Lane Departure Warning System (LDWS) warns the driver if the vehicle begins to move out of the lane owing to driver error, drowsiness or distraction.
- 6. Vehicle Stability Control** The electronic braking system features improved Vehicle Stability Control (VSC) to prevent jack-knifing and overturning.
- 7. Silent version** Both the XF/CF with MX-11 engine and the LF with PX-5 engine are available in a Silent version that keeps noise levels below 71 dB(A). Ideal for distribution in areas where evening, night-time or early morning noise restrictions apply.
- 8. Tyre Pressure Monitoring System** The Tyre Pressure Monitoring System ensures continuous monitoring of the pressure and temperature of all tyres. The system generates warnings when the pressure of a single tyre is low, or the temperature is high, enabling the driver to take swift action. This improves your total cost of ownership due to lower fuel consumption and reduced tyre wear.
- 9. Battery Energy Monitoring** Optional Battery Energy Monitoring allows the driver to check the status of the batteries and provides warnings when energy levels are critical. It also prevents overcharging of the batteries. The result is lower downtime and longer battery life.
- 10. Protective cab suspension and construction** The energy-absorbing cab suspension and reinforced cab structure has pre-programmed front and rear crumple zones to provide industry-leading vehicle safety and passenger protection.
